

FORM D – Fly Zone Request / Update Form

ElectraNet is committed to operating and maintaining an efficient, safe transmission network. As part of our operational activities ElectraNet engages contractors to inspect the network using both ground and aerial activities.

Aerial inspections are conducted using both helicopters and drones – (also known as UAV or RPA). ElectraNet respects that many of our landholders are in rural areas and may have livestock that can be 'startled' by helicopters. As such, ElectraNet will, upon request, implement a 'no fly' or 'caution' zone over these properties. If you would like request one of these zones, please complete this form and return it to Enquiry.Landholder@electranet.com.au

This request relates to the following property:
