Dear Mark

Thank you for your recent submission in response to the ElectraNet South Australian Energy Transformation (SAET) Regulatory Investment Test for Transmission (RIT-T) Project Specification Consultation Report (PSCR), dated 7 November 2016. Following review of your submission, we have identified some items that require clarification. Would you please provide a response to the following queries?

The following information, not all of which was requested in the Supplementary Information Paper (SIP) dated 13 February 2017, is required to assess the suitability of your proposal:

- The specific technical data relating to the network and non-network components of your submission, as requested in section 3.3 of the SIP;
- The cost information, especially for transporting frequency control ancillary services, as requested in section 3.3 of the SIP;
- Number of hours of planned maintenance/ annum;
- Mean Time Between Failure; and
- Mean Time To Repair.

Once we have received this additional information, we expect to engage further with you as set out in section 5 of the SIP.

Please note that should the initial assessment determine that non-network options are likely to form part of the preferred solution under the RIT-T, it is proposed that additional technical modelling of non-network solution options and the optimisation of their type and location will be carried out. Please also note that we intend to use third party expert consultants to undertake this work.

We request your prompt response to the queries above, and in any case, no later than 28 April 2017.

If you have any questions or concerns regarding any of the matters raised in this letter, please contact Josh Smith in the first instance on 08 8404 7997 or at [consultation@electranet.com.au](mailto:consultation@electranet.com.au).

Yours sincerely

Hugo Klingenberg
